Evaluation of Interview

The interview was taped in the room of Library. The Library room is so quiet, comfortable and security for my interviewee. Apart from the drilling sound in the background, there will be no problems whatsoever with transcription. At the start of interview, I feel so nervous because I haven't done any interview before. The interviewee (Mr. Wong Chi Keung) sometimes takes a break to memorize and organize his childhood life. When Mr. Wong Chi Keung talks of his childhood life especially of his own family, he is so sad and frustration at that time. Finally, I stated that this interview was successful.
